**INCIDENT REPORT**

*Kraft Fertilizer Service – June 14, 2013 – Wyoming (Stark Co.):* The incident involved the release of 22 gallons of 28% Roundup WeatherMax into roadside right of way due to a vehicle accident. The accident occurred near the intersection of county roads 800 E and 300 N near Wyoming. The RP removed the impacted soil from the ditch.

*Norfolk Southern – June 27, 2013 – Tilton (Vermilion Co.):* The incident involved the release of approximately one gallon of a herbicide spray mix due to a collision of end of the spray boom with an oncoming freight train. Norfolk Southern contracted Bodine Environmental Services to clean up the right of way and the locomotive.

*Growmark, Inc. – July 2, 2013 – Sullivan (Moultrie Co.):* The incident involved the release of approximately 3,000 gallons of 32% UAN fertilizer solution from a pump failure at the facility location. The facility excavated contaminated soil/gravel. IDOA personnel investigated on July 3, 2013.

*Northern Partners Cooperative – July 3, 2013 – Sublette (Lee Co.):* The incident involved the release of approximately 5 gallons of a mixture containing Touchdown Total, Cadet, and Fusilade DX from an overturned sprayer. The product was spilled when the sprayer was lifted upright. The RP recovered the spillage from the roadside ditch.

*Freddie Goekner Farm – July 8, 2013 – Altamont (Effingham Co.):* The incident involved the release of 500 gallons of a mixture of ammonium sulfate, Roundup, and Interlock herbicide from a transport tank which slid of the trailer into a roadside ditch along US Route 40 near Altamont. The RP contained and recovered the spilled product and excavated the impacted soil. The RP also flushed the ditch with clean water and recovered the flush water. IDOA personnel investigated on July 8-9, 2013.

*Woodley Aerial Spray – July 25, 2013 – (Ogle Co.):* The incident involved a aerial application plane crash. The plane was carrying 380 gallons of a fungicide mix.
