

State of Illinois
Department of Agriculture
Bureau of Environmental Programs

***FIRST AMENDMENT TO THE
GYPSY MOTH INTERIOR QUARANTINE***

Pursuant to the Insect Pest and Plant Disease Act (505 ILCS 90/1 et seq.), the Director of Agriculture has determined that it is necessary to quarantine portions of the State in order to prevent the spread of a dangerous plant pest known as the GYPSY MOTH, *Lymantria dispar* (L.). This plant pest, injurious to forests, ornamentals, and lawn shade trees, has been introduced into the State and incipient infestations have been identified in the State.

The quarantine established by the Director of Agriculture on August 7, 2000 is hereby amended as follows:

Section III. Regulated Areas, shall read:

“The entire counties of Cook, DuPage, Lake and McHenry and any other area within the State of Illinois contiguous to the aforementioned area where presence of the Gypsy Moth, *Lymantria dispar* (L.), is confirmed in the future.”

These amendments to the Quarantine shall be effective on or after this **12th** day of **April 2007**. All other provisions of the original quarantine, as previously amended, shall remain in full force and effect.

Chuck Hartke, Director
Illinois Department of Agriculture
