

## INCIDENT REPORT

(SEPTEMBER 13, 2012 – DECEMBER 4, 2012)

Crop Production Services – September 20, 2012 – Chatton (Adams Co.): On September 20, 2012, a tender truck containing approximately 12.5 tons of dry fertilizer overturned and spilled into a soybean field. The facility employed a vacuum truck and shovels to recover the dry fertilizer spilled in the field.

Illinois Valley Supply, LLC – November 2, 2012 – Rockbridge (Jersey Co.): A hitch broke on a side-by-side anhydrous ammonia trailer allowing one tank to roll down an embankment near a creek and pond. Approximately 2000 pounds of ammonia was released. Local fire dept. misted approximately 6,500 gallons of water onto the tank to reduce the vapor cloud. The creek was dammed with agricultural lime and a vacuum truck was contracted to recover the contaminated water. A nearby residence was evacuated as a precaution.

Crop Production Services, Inc. – November 21, 2012 – Irving (Montgomery Co.): A truck transporting a single 220-gallon mini-bulk container containing Simazine 4L herbicide overturned releasing the product into a small unnamed tributary to Hillsboro Lake. The facility constructed dams on the ditch to isolate the spillage and excavated impacted soil. The soil was transported the Harvel facility where it was stored under roof on a concrete floor
