

INCIDENT REPORT

(JUNE, 2016– AUGUST, 2016)

The Andersons – July 29, 2016 – Champaign (Champaign Co.): The incident involved the release of approximately 250 gallons of 32% UAN liquid fertilizer. The incident occurred at the intersection facility location. The released was caused by a hose disconnect during unloading (receiving) of a rail car transport. The RP excavated affected soil. IDoA responded.
